

To our patients and families:

We hope each of you and your families are doing well and are healthy and safe during this period of uncertainty.

We are continuing to follow the CDC, state and local governments' guidance and directives regarding the continued circumstances as they relate to the COVID-19 pandemic. The health and safety of each of you, your families and our staff remains our top priority.

At this time, we have determined an extension of the closure of our centers is necessary to continue to mitigate the risk of exposure and spread of the virus. At this time, **all locations will remain closed through Saturday May 2<sup>nd</sup>, 2020.**

We are currently delivering teletherapy services to patients. In addition, there are opportunities in school settings based on each district's approval, and Early Intervention, as teleintervention, is approved at the county level. If you have any questions or are interested in teletherapy services please email [wynfrontdesk@theraplayinc.com](mailto:wynfrontdesk@theraplayinc.com) or [click here](#).

We will continue to communicate regularly through email, our Facebook page and website. We expect that when we re-open our centers, we will provide options for extended and additional patient care hours.

We know these are unprecedented times of uncertainty and we recognize the current events have been challenging for everyone; we thank you for your patience and trust during this difficult time.

Sincerely,

Theraplay, Inc.
